

PROFESSIONAL SPORT

STARPOOL

wellness concept

In a world that spins fast,
we create wellness oases where time slows down.

Spaces and programs dedicated to health, beauty, and self-care.
Places where body and mind regain harmony and vigour.
Because making people feel better is all that we want.

The challenges for professional sport

The enhancement of sport performance does not depend only on the quality of the training itself.

Athletic performance requires both **mental and physical effort**: training sessions, matches and away games come in quick succession.

This translates in constant dedication to achieve the **best result in every activity**.

In professional sport, **rest and recovery** play a paramount role, as much as training and effort. If adequately integrated in athletes' preparation programs, they allow not only to achieve **top performance** in a short time, but also to maintain it in the medium to long term.

This is the reason why, today, a new focus arises which is critical in the assessment of performance in professional sport.

It is **as important as training** itself and must advance hand in hand with it: **recovery**.

Our **advanced products and programs**, stemming from scientific research, favour **fast recovery** - becoming valuable allies to ensure top performance at all times.

Fabian Tait, midfielder FC Südtirol.

The value of recovery

Factors that impact sport performance.

Many are the elements that impact the performance of athletes. Some trends may vary over time, but the fundamental elements found at the base of the pyramid are **sleep** and **recovery time**, closely followed by nutrition and hydration.

The pyramid also shows additional strategies that, if integrated in athletes' daily life, contribute to the enhancement of performance: **hydrotherapy, compression and massage techniques**, supported by more and more innovative technologies, are among the activities that are backed up by increasingly advanced scientific research.

Our products act on the base of the pyramid and contribute to improving sport performance. We implement **cutting-edge technologies** in support of athletes, which enhance the time dedicated to recovery, by taking advantage of the body's natural physiology to favour **top performance at all times**.

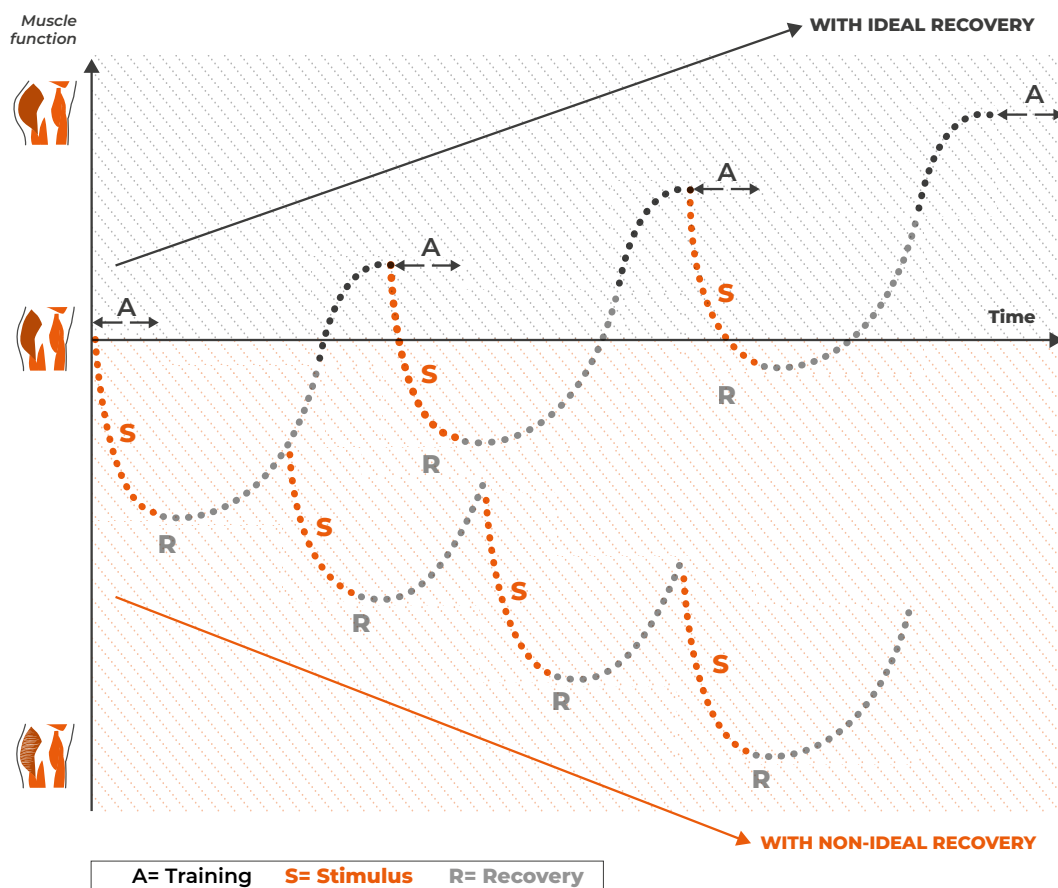

Physical recovery.

After physical effort, it is necessary to grant your body an **appropriate rest period** to allow your muscles to recover and restore their normal functioning.

When muscle activation is excessively frequent, there is a risk of overload which may lead to a gradual performance loss from the medium to long term.

The recovery phase is fundamental, in that it allows the body **to trigger the necessary processes of reconstruction and regeneration** to regain balance and enhance one's capabilities before the next physical effort.

However, in the world of professional sport, the calendars are packed with matches and training sessions, which make it difficult for athletes to take the necessary time for physiological recovery.

Which is when it is necessary to focus on the **quality of recovery**

- fundamental to restore effective muscle strength.

Our products were designed to meet these requirements, **using cutting-edge technologies that favour physical recovery** with the goal of enhancing athletes' sport performance and well-being.

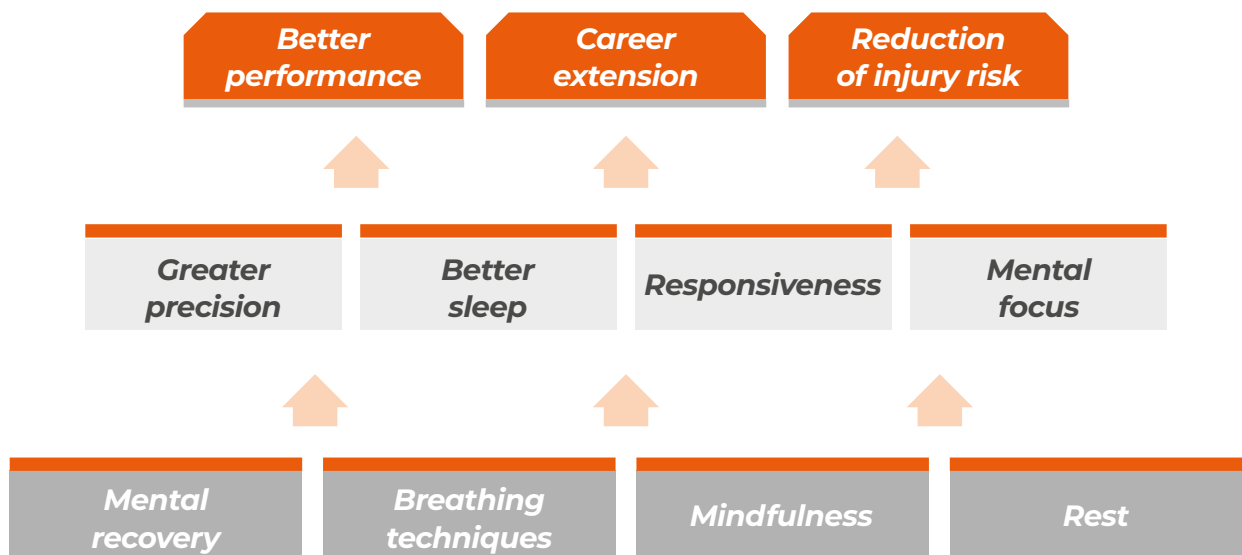

Denise Herrmann-Wick, gold medallist at the Biathlon world championship.

Mental recovery.

Mental readiness, understood as actual training and correct recovery time, can have a significant impact on athletes' sport capabilities.

Correct **rest**, combined with exercise that have great cognitive impact like **Mindfulness** programs, help athletes to visualise and train their brain abilities. This favours a **more effective management of stress** and **better focus; conscious breathing**, on the other hand, contributes to **improving athletic performance**.

Adequate mental recovery has multiple benefits: reduction of injury risk, precision increase, quick decision-making ability, better sleep and fast recovery after intense physical effort.

At Starpool, we develop solutions for recovery that take into account these needs, using **technologies that support the decompression phase** after the match and favour **the training of both physical and mental strength**, with the goal of making the most of the athletes' sport performance and well-being.

Federico Pellegrino, cross-country skiing Olympic medal.

Why choose us?

All-round offer

We've long supported **athletic trainers and sport doctors**, as well as the best international sport teams.

We don't just provide equipment: we are a reference, an **all-round partner** for the realisation of effective and practical spaces dedicated to recovery and to the enhancement of psycho-physical performance.

Integrated projects

Our cutting-edge wellness solutions **combine perfectly with different training programs** and contribute to making the most of performance.

Innovative solutions conceived for body and mind recovery and regeneration, functional to the specific needs of the team or athlete, for complete psycho-physical well-being.

Revolving around individuals

Our approach to recovery in sports **revolves around individuals**, their physiology and psychology.

A kind of wellness that is founded on scientific research and defines **bespoke solutions for recovery and self-care**, through products that combine quality and innovation with programs of use that are functional to individual goals.

Meeting the needs of professional athletes is the first step in ensuring they **make the most** out of each performance.

Effective results

We support medical and athletic staff with all of our solutions dedicated to psycho-physical recovery: we help them identify the **best programs of use** to integrate in their athletic preparation routine.

Our innovative format ensures the **utmost effectiveness** of the time devoted to recovery, thanks to the best technologies stemming from Starpool's experience.

The Starpool method

The Starpool method expresses our idea of well-being, revolving around the individual and offering benefits to body and mind.

It is an ever-evolving approach that is based on scientific research and is reflected on the **design and realisation of technologies** dedicated to Wellness, recovery and self-care.

We think that **products and services of proven effectiveness** can only result from an accurate and in-depth project of analysis and research.

Scientific Research Department

Our Scientific Research Department **builds partnerships and analyses the results of studies carried out in collaboration with prestigious research institutes** and leading institutions in the world of medicine, sports and neuroscience. Our goal is to **support trainers and sport doctors in the definition of the most functional solutions and recovery programs for the athletes and their teams.**

Our DNA

The origins of the Starpool method lie in thermalism and its thousand-year-old tradition, which makes up our DNA: heat, water, rest.

The alternation of these three phases, adjusted to the requirements of professional sport, brings authentic psycho-physical benefits to athletes.

Independent of the specific products, the format based on heat, cold and Dry Float Therapy completes their daily life in three crucial moments: physical activity, rest day and injury management.

Water

Water is the fundamental element of cold reactions. They allow the body to rebalance its temperature after being exposed to intense heat and to trigger a series of beneficial psycho-physical reactions.

A close-up photograph of a person's skin, likely a neck or shoulder, with a wavy, concentric pattern overlay. The pattern is composed of many small, overlapping circles and lines, creating a textured effect. The background is dark, and the skin is illuminated with a soft, blueish light.

Heat

The starting point of every wellness experience.
The temperature rises and the body is overheated,
activating the cardio-circulatory system
and triggering beneficial perspiration.

A close-up photograph of a person's skin, likely a neck or shoulder, with a wavy, concentric pattern overlay. The pattern is composed of many small, overlapping circles and lines, creating a textured effect. The background is dark, and the skin is illuminated with a soft, blueish light.

Rest

Rest is the state in which our body experiences relaxation
and psycho-physical regeneration.
A restful state is fundamental to assimilate
the beneficial effects of heat and cold.

The physiology of heat exposure

Heat has always been employed for its beneficial effects on the muscles and nervous system.

The processes of heat production and transfer regulate body temperature and keep it balanced.

When the outside temperature and humidity rate change, **the body gives a physiological response** according to the differences that it perceives.

The responses of vasodilation, cardio-circulatory system activation and perspiration are triggered subjectively in order to **maintain the body's temperature balance**.

Thanks to our constant research, we at Starpool use the body's physiological responses by offering solutions that apply to sport and that take advantage of the different types of heat - like the dry, intense heat of the **Finnish sauna** or the deep heat of the **Infrared Therapy** - to produce beneficial effects.

The benefits

FINNISH SAUNA

INFRARED THERAPY

**Cardio-circulatory
system training**

**Peripheral blood
flow promotion**

**Greater tissue
oxygenation**

**Muscle
relaxation**

**Faster drainage
of metabolic waste**

**Greater endorphin
production**

Ideal for:

*Passive cardio-circulatory
system training on rest days,
to ensure continuous
athletic preparation.*

*Passive warm-up before
the training and matches,
microcirculation promotion
and muscle pain
reduction on rest days.*

The physiology of cold exposure

Cold exposure has always been used in physical activity to promote recovery.

From a physiological standpoint, the exposure to cold and low temperatures can trigger **different types of response from the body**.

The intensity and type of response are determined by the time of exposure and cooling rate.

A reduction in muscle pain, vasoconstriction, and the activation of the endocrine system are only few of the physiological responses that are triggered by intense cold.

Our solutions are based on the body's physiological response and **take advantage of the reactions caused by intense cold to produce beneficial effects in the field of sports**.

The benefits

A man in athletic wear stands with his arms outstretched, head tilted back, and a joyful expression. He is centered against a dark, smoky background. Six text boxes, each with a diagonal orange pattern, are arranged around him, listing the benefits of cold therapy. In the top right corner, there are two solid-colored squares, one dark orange and one bright orange.

**Pain reduction and
muscle relaxation**

**Lower stress
levels**

**Strengthened
immune system**

**Faster
metabolism**

**Faster
recovery**

**Reduction of edema
and inflammation**

*Cold exposure right after a physical effort
triggers vasoconstriction and the activation
of the endocrine system, which help reduce the feeling
of fatigue on the following days.
Cold therapy also offers valuable support in the treatment
of sub-acute injuries, inflammation, and contractures.*

The physiology of the Dry Float Therapy

Dry floatation is the only system in the world that allows to recreate the effects of zero gravity.

Thanks to the lessened weight perception and to the dry environment which does not alter the vestibular system, the brain detects a chance for **relaxing and decreasing the involvement of the neuromotor system**, resulting in a different mechanism, and preventing any side effects on the performance markers.

Through research, we are now able to make the most of this mechanism. When combined with training and specific programs of use, the **Dry Float Therapy** promotes blood flow and improves the cardiovascular system thanks to the **activation of the parasympathetic system**.

The benefits

**Peripheral blood
flow promotion**

**Heart Rate Variability
increase**

**Reduced muscle
fatigue**

**Spine
relaxation**

**Better quality
of sleep**

**Reduction of stress
and anxiety**

The Dry Float Therapy allows body and mind to regain energy easily, conveniently, and quickly - favouring better sport performance.

The power of the mind

Keeping balance between body and mind is crucial to maximize sport performance.

Over the last few years, scientific research has proven that **mindset and physical preparation** are equally important to achieve successful performance. Sport psychology has developed several approaches oriented to mental training, like **Mindfulness** and **Brain Training programs**.

This is why, together with renowned partners in the fields of research and sport, we have developed products that favour athletes' psycho-physical health.

MINDFULNESS

The brain and nervous systems must be trained just like the musculoskeletal system. Mindfulness is a **mental exercise of awareness** that teaches you to live in the here and now, and to manage life effectively.

Scientific research is building broad consensus in the domains of psychotherapy, corporate wellness and sports. Our commitment in this direction has led us to develop **five audio-guide programs** in collaboration with a team of neuroscientists.

BREATHING TECHNIQUES

Learning how to breathe well means producing a **positive impact on your psycho-physical health**. From sports to work, **good breathing allows you to improve your performance** and achieve a much better quality of life.

Thanks to our collaboration with world freediving record holder and international coach of breathing techniques Andrea Zuccari, we have developed **five exercises of diaphragm and chest breathing**.

A journey that takes you from the full awareness of your breathing to the full control over it.

The benefits

MINDFULNESS

**Better
focus**

**Reduction of stress
and anxiety**

**Living in the
here and now**

BREATHING

**Lowered blood
pressure**

**Greater tissue
oxygenation**

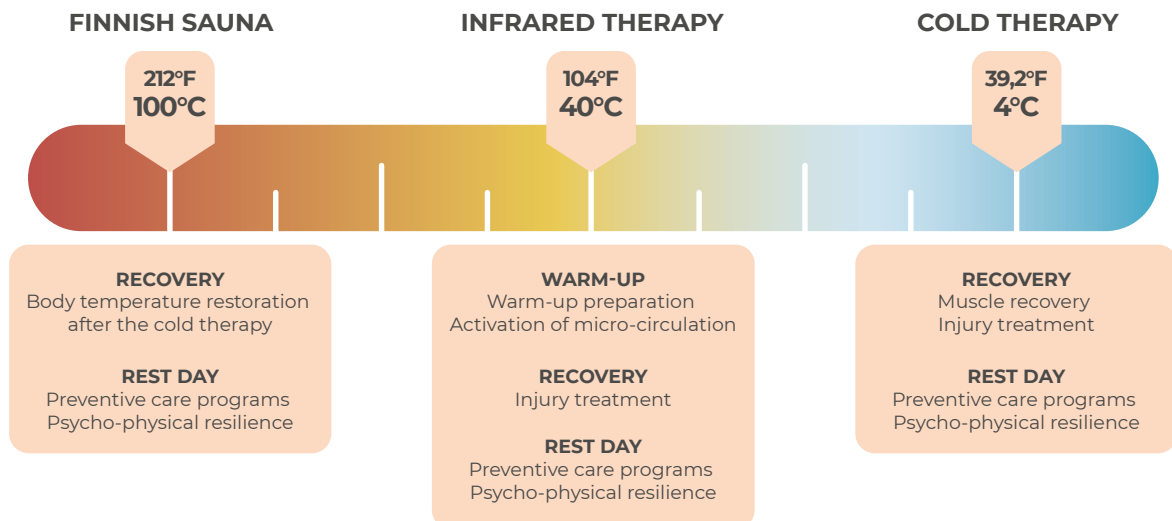

**Better quality
of sleep**

*Our Brain Training programs are included
in the software of use of Zerobody Dry Float
and are available in five languages.
The secret to feeling in real shape is training
your mind, and not just your body.*

Our formats for professional sport

Recovery Lab and Recovery Station are the formats designed to support sport professionals with innovative technologies and effective programs for athletes' recovery and performance.

Anton Bernard, former captain of Hockey Club Bolzano Foxes and of the Italian Men's National Hockey Team.

Recovery Lab

The best support for the team.

A format designed to **adjust to different contexts and spaces inside the performance centre**. It can be installed in an area entirely dedicated to recovery or included in the spaces dedicated to training.

It does not require structural works and has low management costs, while offering everything that sport professionals need.

Its effectiveness is ensured not only by a careful designing of spaces and by cutting-edge equipment, but most importantly by the definition of **programs of use that blend in perfectly in athletes' training schedules**, contributing to the improvement of performance.

The format relies on:

Sport Sauna

The Finnish sauna, thanks to its **dry and intense heat**, maximizes the effectiveness of training programs and contributes to raising sport performance to top levels.

Sport Sauna combines the quality and innovation of our products with an **ergonomic and functional design**, developed to become integral part of the areas dedicated to recovery.

Come discover it all on Sport Sauna

Sport Infrared Cabin

A cosy and functional environment that **makes the most of the regenerating power of infra-red rays**, and that can quickly transform into a **Finnish sauna**.

The ergonomic seat, which transfers deep heat thanks to the special lamps installed on the backrest, makes this the ideal solution to complete training and performance programs with the **Infrared Therapy**. Thanks to the electric stove, this cabin can also easily be transformed into a Finnish sauna, characterised by a regenerating, **dry and intense** type of heat.

Sport Infrared Cabin is the result of our experience in the world of Wellness, to bring all **the benefits of heat to the world of sports** with functionality and versatility.

Come discover it all on Sport Infrared Cabin

Sport Infrared Lounger

A valid alternative to the Infrared Cabin, our Sport Infrared Lounger is the ideal solution to create practical **stations dedicated to infra-red rays therapy**, which are especially functional for sport teams.

Thanks to the **adjustable backrest** and its **ergonomic shape**, Sport Infrared Lounger can be integrated perfectly in areas dedicated to professional sport recovery.

Come discover it all on Sport Infrared Lounger

Ice Bath

Ice Bath is a simple and versatile solution to enjoy actual **baths in icy water** and have all the benefits of the cold therapy; it is ideal for recovery in the world of professional sport.

Its reduced dimensions make it easy to move and install everywhere.

Through a simple touch-screen display, you can **regulate water temperature from +4°C to +38°C**, making Ice Bath a perfect solution for hot baths and Kneipp Therapy too.

Come discover it all on Ice Bath

Zerobody Cryo

Zerobody Cryo is the Starpool revolution in the world of Cold Therapy. Innovative in its simplicity, safety and accessibility, it features a **patented water membrane that wraps the body entirely without the need to get wet**, at a functioning temperature of 4-6°C in a safe and non-invasive environment.

A versatile solution that brings the same benefits as cryotherapy and immersion in icy water.

The access is gradual, making the approach to cold therapy easier - and not just in sports, but also in the daily life of people who want to start their day with an energy boost.

Come discover it all on Zerobody Cryo

Zerobody Dry Float

Zerobody Dry Float is a one-of-a-kind system that allows body and mind to recover their energy easily and effectively by **reproducing the effects of zero gravity**.

The body floats over 400 litres of warm water, without the need to get undressed or wet.

Zerobody Dry Float is **a technological innovation in the service of regenerative well-being** that produces a positive impact on: stress, muscle and joint pain, sleep, focus, and psycho-physical recovery.

Come discover it all on Zerobody Dry Float

A blurred office scene with a person working at a computer. The person's arm is visible, wearing a white shirt and a black patterned wristband. A red lanyard with a white tag is also visible. The background shows office shelves and other equipment.

Our services

Services

Consulting, Training, Engineering and Technical Support
are the four pillars sustaining our whole work.

Together, and thanks to the people who are part of our reality,
we develop **ambitious projects** based on our clients' real needs,
supporting and accompanying them every step of the way.

We'll support you in each phase, starting from the project,
in order to help you make the most of our products
and show you their full potential.

Being your **Wellness partner** pushes us to always
do our very best, to develop **effective and functional areas**
dedicated to recovery and to the improvement
of athletes' psycho-physical performance.

[Discover more about our services](#)

CONSULTING

Our professionals are **by your side in every phase of your project** to help you make the most of every product you choose. They will support you **from the original idea to the final realisation**, helping you to identify the best solution in terms of **sustainability, management, function and design**.

TRAINING

Our Scientific Research Department is available to **configure products and programs of use in the best possible way**, and to share specific guidelines. Our **support** is always **tailored** on each specific case and contributes to defining the alternation and duration of the sessions, according to the desired benefits and to the characteristics of each sport.

ENGINEERING

We shape and create any request, even the most unique, and we provide all the useful information to create any desired wellness solution. **We provide for careful monitoring and guaranteed high quality in all production processes**. Our R&D department works constantly to provide the technical documentation required to realise every project.

TECHNICAL SUPPORT

We provide **fast and constant technical support service, covering the hardware and software as well**, thanks to our specialised technicians who give assistance to our clients in the shortest possible time, ensuring **prompt, inexpensive action** to prevent anomalies and malfunctions.

Our Ambassadors

Steve Tashjian

HIGH-PERFORMANCE CONSULTANT, EX HEAD OF PERFORMANCE OF THE USA MEN'S NATIONAL FOOTBALL TEAM

"Zerobody Dry Float was a fundamental element in our Recovery Lab during the FIFA World Cup in Qatar. With it, we were able to improve muscle recovery, the response of the central nervous system and the quality of sleep, reducing the activity of the sympathetic nervous system. I'd recommend it to any sport team or athlete, without the hint of a doubt!"

Elliot Williams

FUNCTIONAL PERFORMANCE DIRECTOR, SAN FRANCISCO 49ERS

"We started with one [Zerobody Dry Float], but our guys loved it so much that we ended up buying another three. If you are looking for an effective solution for recovery that all athletes will want to use, I strongly recommend Zerobody and Starpool's solutions for sports!"

Evan Neal

TACKLE, ALABAMA CRIMSON TIDE

"Man, it feels amazing! As far as training goes, it takes pressure off my back. Zerobody Dry Float is really good for recovery, in my opinion. I like to come in here after trainings and take a couple minutes and relax. This relieves a lot of strain and pressure off my back. I'm really grateful that we have these."

Jeff Allen

ASSOCIATE ATHLETIC DIRECTOR, ALABAMA CRIMSON TIDE

"We were incredibly strategic with how we planned what we wanted to go into our Sports Science Center when it comes to recovery. We wanted things that no doubt would have physiological benefits for our athletes, something that we knew would help them. It would have been really easy, I think, for us just to build a room full of nap beds, and that would have been OK. But we wanted to raise the bar and do something unique, and I think we've done that. I'm really excited about the opportunity to use Zerobody Dry Float."

Sebastian Aho
CAPTAIN, CAROLINA HURRICANES

"We've been the first professional sport team to have a Zerobody Dry Float by Starpool installed in our facility. We use Zerobody Dry Float for many purposes, from muscle recovery to the treatment of a number of injuries, like concussions, neck and back injuries, and troubles connected to joints. The possibility to bring the body back to a state of calm and deep relaxation is a great way to recover from the strain that our sport requires."

Jaylon Smith
DEFENSE, DALLAS COWBOYS

"As a NFL professional athlete and entrepreneur, I'm always on the move. My days are so hectic that I can rarely rest as I should. I love Zerobody Dry Float because it relaxes my mind and regenerates my body in just 30 minutes!"

Dorothea Wierer
WORLD BIATHLON CHAMPION

"The benefits of Finnish sauna, Infrared Therapy, cold reactions and Zerobody Dry Float have a very important role, and - thanks to the Recovery Station developed with Starpool - I can enjoy them when and how I want, being able to integrate recovery in my athletic and personal schedule in complete privacy".

Denise Herrmann-Wick
GOLD MEDAL AT THE BIATHLON WORLD CHAMPIONSHIP

"As a biathlete and an Olympic champion, I train for about 1,000 hours a year. With such an intense pace, recovery is key for top performance at all times. That's why I chose Starpool: I can regenerate my mind and recover perfectly after races and training sessions, thanks to the appropriate combination of sauna and Dry Float Therapy."

Federico Pellegrino
OLYMPIC MEDAL - CROSS-COUNTRY SKIING

"Cross-country skiing is a discipline that requires great commitment and constant travel. After an exhausting training or a long trip, being able to recover mental and physical energy in a fast and effective way is fundamental for me. That's why I've chosen Starpool!"

Fabian Tait
DEFENDER, FOOTBALL CLUB SÜDTIROL

"Zerobody Dry Float is so useful to me! Especially so if I have very close matches during the week, or during periods of maximum load training. It allows me to recover better and faster."

PROFESSIONAL SPORT

Anton Bernard

FORMER CAPTAIN OF HOCKEY CLUB BOLZANO FOXES

"Using Zerobody Dry Float in combination with the Finnish sauna and the Infrared Therapy by Starpool helps me recover fast after training and matches, and to prepare for athletic challenges in the best possible way. With Starpool, we found a valuable ally for both our physical and mental preparation."

Christian Thuile

MEDICAL PARTNER OF HOCKEY CLUB BOLZANO FOXES

"The combination of technologies such as Zerobody Dry Float, combined with cryotherapy, sauna and infrared therapy, allows us to constantly monitor the parameters of our players and act on their regenerative process. A Performance Center of this standing is undoubtedly an excellence for a renowned club such as our own: being successful on ice depends first and foremost on the players' health."

Fabio Diana

TEAM DOCTOR, AQUILA BASKET TRENTO

"The reduced perception of soreness and muscle stiffness in the sessions with Zerobody Dry Float improves the feeling of recovery and favours both relaxation and mood. We use the Dry Float Therapy also to improve the quality of sleep and the recovery caused by muscle relaxation after long trips or close together events. This is also helpful to facilitate the work of the physical therapist and massage therapist."

Stefano Migliorini

ITALIAN CROSSFIT CHAMPION

"In 2019 I suffered a bad injury right before the qualification round for the Games. Besides the pain, I had to deal with many negative emotions: fear, frustration, rage. I started a program of ideo-motor rehabilitation on Zerobody Dry Float, supported by my coach and a mental trainer. Even the medical staff was surprised by how much dry floatation, combined with visualisation techniques helped me move past the psychological trauma, and how much faster I recovered from my shoulder injury!"

Ernest Briganti

CO-OWNER & HEAD COACH, REEBOK CROSSFIT LAB

"We're really happy with the results achieved thanks to Zerobody Dry Float and the program of ideo-motor rehabilitation for Stefano Migliorini. The medical team that managed the check-ups could see that the shoulder was working during the mental training, and they were very satisfied of the post-op recovery time."

Kyle Jones

CO-FOUNDER OF iCRYO

"Zerobody Dry Float is an extraordinary solution for our franchising model. It is the only service that really offers a zen experience from a mental standpoint, while giving major physical benefits. Both the staff and the guests consider it an extremely valuable treatment."
