# *Wellness as a daily habit*

The need to take care of oneself with continuity is increasingly widespread.

**Psycho-physical well-being** is closely **related to life style**,  
to nutrition choices, to physical activity and to sleep quality.

Taking care of yourself and nurturing your **well-being as a good  
daily practice** is the best way to stay healthy for a long time.

Having a healthier approach to life means loving oneself, day in and day out.

Improving the quality of sleep, lowering the levels of stress and **treating oneself to moments of profound relaxation**, are all key activities to maintaining harmony between one's body and mind.

It is scientifically proven that the right amount of rest together with specific Wellness programs, realised according to one's own needs, **favour the strengthening of the body** and of its immune system.

*Wellness whenever you want,  
wherever you want*

The creation of a Wellness space at home helps to feel good and live well every day.

**Using a spa regularly** allows to enhance the benefits and assess the results first hand, while discovering the unique pleasure of relaxation and regeneration before facing a new day, or to end it on a high note.

# *Why choose us?*

We bring wellness to your doorstep, to enjoy all the **benefits of a spa without leaving home** while discovering the unique pleasure of relaxation and regeneration in total harmony with yourself.

Complete, functional and cutting-edge Wellness solutions characterised by **exclusive and modern design**, that blend perfectly in the taste, colours and shapes of your home.

Choice of materials, unmistakable style, technological innovation and careful designing: **all the quality of a professional spa right at home.**

## *The Starpool method*

Our mission is to **take care of people, favouring psycho-physical balance.**

The Starpool method expresses our idea of wellness, which **revolves around the individual, ensuring benefits for both body and mind, and is based on innovation and scientific research.**

We reinterpreted the cultural heritage of the spa tradition from a modern perspective, exploring the many representations of wellness with a multidisciplinary approach.

We work with leading figures in the fields of medicine, sport and neuroscience to **provide effective and safe methods of use for our equipment**, and we pour our acquired knowledge into products and services.

A constant research activity allows us to have the tools to design cutting-edge Wellness Solutions for the home environment.

Offering wellness requires knowledge, competence and skills.

**We make our experience available to those who want to create a private spa** with the same comforts of the large Wellness centres.

## *Heat, water, and rest: back to basics*

The origins of the Starpool method lie in **thermalism and its thousand-year old tradition**, which makes up our DNA: heat, water, rest.

The alternation of these three moments allows us to create **innovative Wellness solutions**, now attested by scientific research, that can provide authentic psycho-physical benefits through actual multi-sensory programs.

On this formula, we have also defined a **system of space designing** which is based on the perfect succession of these three phases, to ensure people's well-being from a scientific standpoint.

The starting point of every wellness experience, heat is the fundamental element in saunas and steam baths, where the body reacts to overheating by activating the cardiovascular system and triggering beneficial perspiration.

Water is the fundamental element of cold reactions, which allow the body to rebalance its temperature after being exposed to intense heat and to trigger a series of beneficial psycho-physical reactions.

Rest is the state in which our body experiences relaxation and psycho-physical regeneration. This condition is necessary to make the most of your wellness experience.

*Our home  
wellness  
offer*

A photograph of a modern interior space. The ceiling is made of exposed wooden beams and rafters. A large window on the right side of the frame looks out onto a balcony with a white railing. In the foreground, a dark wood-burning stove is visible, with a fire burning inside. The floor is made of light-colored wooden planks. A white cabinet is visible on the right side of the room.

**We revolve around individuals** and their health with methods, products and services that come from tradition and are perfected through innovation. Combined, they show all of the art they are capable of.

**Products that are transformed into actual décor objects** which can be aesthetically adjusted to every room of the house and that meet the desire of those who **want to live a Wellness experience in a private environment.**
